

Trustworthy, Professional, Responsible

# TAIWAN NO.1 ANTI-HUMIDITY TECH.

The leading brand for dry cabinets  
World Class Standard

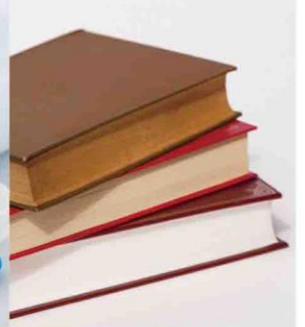

- .Top MIT quality
- .Nearly 30 years manufacturing
- .With 8 times super dehumidifier

## What can the dry cabinet do for you?

Many articles for daily use require anti humidity, such as clothes, accessories and jewelry, shoes, bags, 3C products, coffee, tea, medicine, album, roll film, camera, camera lens, and musical instruments. It has function of anti-bacterial, anti-oxidation, rust prevention, and dust mite prevention. Dry cabinet with multi-function can make your life healthier.

## Contents

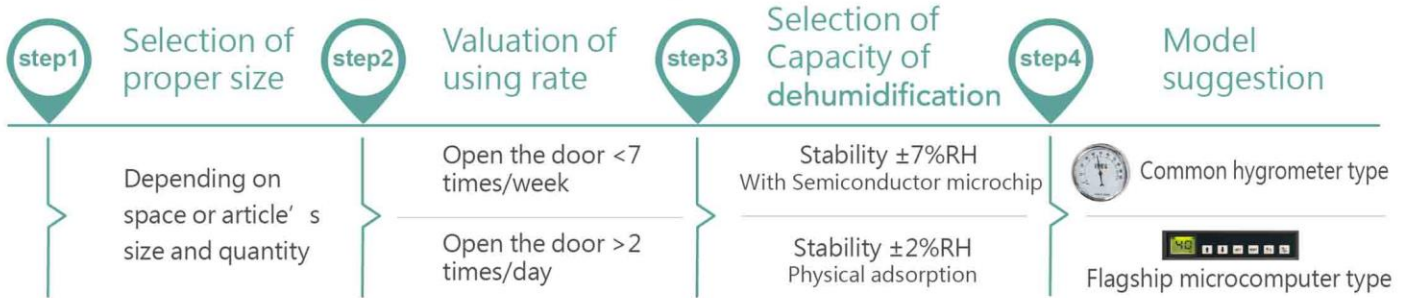

2	Small/Middle Size Dry Cabinet	8	Ultra Low Humidity Storage(1-20%RH)
4	Large Size Dry Cabinet	10	Laboratory Drug Dry Storage
6	Dry Cabinet for Music Instrument	11	Professional and customized service
7	Wooden Style Dry Cabinet	12	About us

# Comprehensive protection of anti-humidity, provide the most appropriate space for preserv

The two dehumidification methods with Physical adsorption and semiconductor microchip are adopted by EDRY. It is available to select the different components to assemble it depending on the request for anti-humidity. All of our products are made

in Taiwan. We have experience in production and marketing. Our technology is stable and safe, therefore, we got a favorable reception from the critics. To buy a right thing is more important than budget saved.

## Steps of selection of a proper anti-humidity cabinet.

## Humidity display

### Common hygrometer type

With Japanese clock core, design for adjusting humidity without gear, high sensitivity of reaction. Send to the third party inspection institute for calibration, 6050、40、30%RH, the report showed that humidity is in tolerance range. Multiple control without any defects.

### Flagship microcomputer type

With LCD panel to provide the most stable control of humidity. Calibrated by the third party inspection institute. It is stable and reliable. Humidity value can be controlled to be at  $\pm 2\%RH$ . Easy operation.

### Common hygrometer type

The common hygrometer type is to dehumidify with the Physical adsorption principle, which is widely used for dehumidification throughout the world. The standard humidity value (40%RH) can be reached within 5 hours. The desiccating material is recyclable, and its dehumidification effect will be remained if power failure after plug it in for one hour. It cannot affect the preserved articles if the humidity value is within  $\pm 7\%RH$ .

### Flagship microcomputer type

The Flagship microcomputer type can rapidly reduce humidity to be at standard value (40%RH) within 30 minutes. It is to dehumidify by means of semiconductor microchip principle. A patented design is original creation in the world. We made the breakthrough from traditional anti-humidity technology to create successfully the stable humidity environment, which is the safest and the most stable technology applied to anti-humidity. The humidity is exactly controlled to be about ( $\pm 2\%RH$ ).

## Flagship series surpass other anti-humidity cabinet

EDRY Flagship series	Comparison items	Other Brands
<ul style="list-style-type: none"> <li>Only set up once, it can stably maintain the humidity for long-term period, and postpone the articles' life.</li> </ul>	<p><b>Win</b> Stability of preserving environment</p>	<ul style="list-style-type: none"> <li>It should regulate the humidity value depending on climate change.</li> </ul>
<ul style="list-style-type: none"> <li>With 8 times super dehumidifier, even the articles contained more moisture, in wet environment, or open the door often, it can dehumidify easily, and quickly return to the set-up value.</li> </ul>	<p><b>Win</b> Rapid dehumidification</p>	<ul style="list-style-type: none"> <li>In high wet condition, it should need several days or weeks to reduce humidity; open the door often can lessen the effect of dehumidification, and humidity is not easy to be reduced.</li> </ul>
<ul style="list-style-type: none"> <li>Start dehumidifying if humidity is over the set-up value, and stop dehumidifying if humidity is lower than the set-up value. It can be controlled the set-up value to be about <math>\pm 2\%RH</math>. No crack or damage occurred if humidity is lower.</li> </ul>	<p><b>Win</b> Exactly control humidity</p>	<ul style="list-style-type: none"> <li>It cannot stop running if unplugged, or lower than the set-up value.</li> </ul>

## Medium-small-size dry cabinet

## EDRY' s patented movable airtight column

EDRY' s patented airtight activity column allows items with a larger width can to be easily stored.

Usually the double-door moisture-proof cabinet will have a center column because of some airtightness considerations, but this design is not good for storing large items.

The strengthened steel board has a durable and solid structure.

You can open either the left or the right door panel.

Color option:  &   
The model has a fast humidity back-down option for opening the door 30 seconds, 5 minutes, 15 minutes, or 30 minutes.

Super fast recovery time within 5mins. EDRY's ultra-low dry cabinet (10% RH or below) is completely manufactured according to the standards of IPC/JEDEC J-STD-033 for managing the IC integrated circuit.

New patent: it can dehumidify without using nitrogen gas, compressor, and high-temperature baking

### Optional accessories

1 The antistatic paint 106~ 109Ω (Surface resistance value)

2 The antistatic glass

3 The antistatic wheels suite x4 Electrostatic ground wire

**Extreme Speed Desiccating Performance**

Industrial desiccating and moisture prevention must be fast and stable. EDRY leads the world to launch the extreme speed desiccating ultra low humidity main desiccating unit to lower the humidity level to less than 10% within 5 minutes and maintain stable 1%RH lowest humidity level in long period of time. One hour after power up, even with power interruption, it will maintain less than 15%RH humidity level in a period of 24 hours. It can completely replace nitrogen

filling and other dry air equipment.

Filled with nitrogen gas control equipment

Optional accessories for load weight shelves

Resistance, heavySpecial steel rack shelves shelves, can load more than 200kg (Optional)

**Ultra-low humidity cabinet:Ultra-fast humidity returning test**

After opening the door for 30 second and the humidity can drop back to 10%RH within 5 minutes. Test model SL-1336CA

The environment has a humidity of 55%RH, a temperature between 25 to 37 °C, and the test is to open the door for 30 seconds to test the humidity return speed. Depending on external temperature changes, test results may vary.

Recovery time / Item	Model Number	Durability of The Dehumidification Core (Under the Condition That the Door Is closed.)	Frequency of Door Opening/Closing	Lowest Humidity Level (RH)	Scope of Application
Return to 10%RH or below in 5 minutes	SL series	Duration for maintaining the RH: The result can last for more than 70 hrs.	Once every 20 to 30 minutes (Frequent door opening, such as more than 5 times in a day)	The moisture level can be reduced to 1%RH or lower, and the level can be maintained for a long time.	1.Moisture-proof management for a MSD element assembly site with a high door opening/closing frequency 2.No high temperature baking; high-moisture level items' moisture-proof management
Return to 10%RH or below in 15 minutes	ML series	Duration for maintaining the RH: The result can last for more than 46 hrs.	Once every 40 to 90 minutes (Frequent door opening, such as more than 3 times in a day)		1.Moisture-proof management for a general MSD element assembly site
Return to 10%RH or below in 30 minutes	TL series	Duration for maintaining the RH: The result can last for more than 26 hrs.	Once every 90 to 180 hrs (The door is opened no more than twice a day)		1.Moisture-proof management for a MSD element assembly site with a low door opening/closing frequency 2.Long-term low-moisture MSD elements moisture-proof storage

# Laboratory Drug Dry Cabinet

This is for air filtering, anti-shock, anti-moist, and complies with public safety standard and also for using in laboratory.

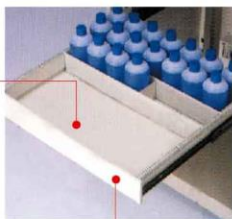

Description of applied articles. The chemical drugs have volatility, corrosive, peculiar smell, irritating, and strong acid and alkali

Specification Item	Outside:H1380xW600xD660mm Inside:H980xW598xD630mm Activities wheels suite		Outside:H1975xW600xD660mm Inside:H1575xW598xD630mm Activities wheels suite		Outside:H1975xW1200xD660mm Inside:H1575xW1198xD630mm Activities wheels suite

The whole series of laboratory drug storage cabinet uses SUS #304 stainless steel with an acid and alkaline resistant powder coating.

- There is a design preventing the drawers detaching from the slide rail
- Collision-proof for the stored drugs: Two at each of the front and back; One at each of the left and right; Adjustable dividers

- Adjustable anti-shock button suckers for the floor

1. The drug cabinet has a built-in 24-hr exhaust purification system.
2. There is a special internal circulation and purification system that need no connection to an external exhaust pipeline and create no exhaust emission or environmental pollution.
3. There is a special pressure difference sensing for determining the use condition of filters.
4. There are multiple types of absorption filters.
5. There is a multi-blade noise-free fan to prevent the motor from idling.
6. The cabinet is fully airtight so no leak of bad odor.
7. The drawer-type top/bottom adjustable trays provide flexible space.

## We have been in the business of manufacturing dry cabinets for 30 years and have built the reliable Taiwan brand in the world.

As a professional anti-humidity products business, we established in 1987 and have 30 years' manufacturing experiences. Our concept is profession, responsibility and trust, we try to reach top level in the world. We also try to serve our customers with thanks to offer them safe and good products. Our products are safe, healthy, qualified, and have reasonable price. We won't have false and deceptive advertising, on the other hand, we try to improve and innovate to

earn more trust and respect from customers and be thankful to our customers for having such opportunity to offer our services.

Trustworthy Professional Responsible

**ISO-9001**

CE

## 100% made in Taiwan and excellent quality.

EDRY Co., Ltd is the largest manufacture of dry cabinet in Taiwan. We have competed ability and reasonable price with good products quality, function, service and reputation. We also have good relationship with our partners. For our agents, we offer better after-sales services. The machine can be disassembled easily. The accessories and spare parts are guaranteed for having good maintenance service. In the past, we faced a big scale of industrial transfer and the low price strategy from China, but we insist on quality so we stay in Taiwan to make effort on our products. We decided to produce good cabinets and provide our customers with good services.

## We insist on using green environmental materials.

For giving our customers a safe and qualified products, we make products with safe, reliable, and environmental materials. All plastic materials such as circuit board, control box, door frame, and doormat must be examined by SGS. The environmental materials exclude lead, mercury, chromium, cadmium, and hexavalent chrome which are poisonous for human. As well as quality control, we have strict requirement on materials to have safe and qualified products.

## The most long service life of components in the world

Our components have long service life for over 20 years. Many customers have used our products for 15 years without any reparation. They still recommend our products to other friends.

## Our factory is certified with international certification.

The operation procedure is made in accordance with ISO 9001 and CE certification. Besides, we have professional humidity testing and patented technique. We are famous in marking overseas.

# Electronic Cabinets New Home Appliances

Protection can be like new

## Prevent moisture well, the Earth more beautiful

Daily life, because wet conditions, resulting in such as electronic equipment, leather, materials, food, musical instruments ... and so on, damp and moldy erosion damage is discarded, not just a waste of resources, but also cause environmental pollution, the earth bear it big burden.

EDRY has long attached great importance to environmental protection, uphold corporate social responsibility, research and development of high-tech wafer dehumidifier, professional and technical dehumidifier moisture fast, energy saving, no air pollution, reduce damage for doing good anti-humidity, for the earth to make environmental protection an effort.
